

RAKSHANA T

SUMMARY

AI and Backend Engineering enthusiast with hands-on experience building intelligent automation systems, multi-agent applications, and scalable APIs. Passionate about solving real-world problems through innovation, hackathons, and continuous learning.

TECHNICAL SKILL

- Languages:** Python, C, Java, SQL
- Backend:** FastAPI, Node.js, REST APIs, Socket.IO
- Databases:** MySQL, Redis, PostgreSQL
- AI Technologies:** LLMs, RAG, CrewAI, LangGraph, Groq API
- DevOps & Tools:** Docker, Git, GitHub, VS Code

EXPERIENCE

Student Trainer – AI Agents & n8n

April 2026

Bannari Amman Institute of Technology

- Delivered a hands-on workshop on **AI Agents and n8n** for junior students.
- Explained AI agent concepts and demonstrated **real-world workflow automation** using n8n.
- Assisted participants in building AI-powered automation workflows through live practical sessions.

PROJECTS

APIFORGE | AUTONOMOUS BACKEND GENERATION SYSTEM

May - June 2026

Tech Stack: FastAPI, CrewAI, LangGraph, Redis, Docker

- Built an **11-stage multi-agent** pipeline that converts natural language to production-ready FastAPI apps, cutting dev effort by **80%**.
- Automated code generation across **5 layers** with zero cross-layer inconsistency, reducing **dev time by 60%**.
- Engineered self-healing validation with auto-testing, slashing **debugging effort by 70%**.

DEBUGGING AGENT

Feb-2026

Tech Stack: Chrome Extension, FastAPI, Groq (Llama 3)

- Built a Chrome Extension (MV3) **capturing 4 signal types** (fetch, errors, DOM mutations, user events) into a real-time causal timeline.
- Detects silent API schema mismatches and correlates component lifecycles, cutting **bug pinpointing time by ~60%**.
- Integrated FastAPI + Groq (Llama 3) to deliver root-cause explanations with **confidence scores in under 10 seconds**

EDUCATION

Bannari Amman Institute of Technology, Sathyamangalam

Expected 2028

B.Tech – Computer Science and Business Systems (CSBS) | **CGPA: 8.97/10**

ACHIEVEMENTS

- TANCAM-2025:** Selected among 400+ teams in the hackathon; developed a web application to help people with disabilities find job opportunities.
- HACK TO THE FUTURE-2025:** Selected among 200+ teams for the offline hackathon after qualifying through the online round.
- Achieved the highest CGPA** (above 9.0) in the department in the first and second semester
- LEETCODE:** Solved 200+ problems.
- Completed 2 certifications from Oracle Foundations.
